Inspiring People Saving Oceans

Help Save the Coral Triangle!

LET'S PROTECT
THE OCEANS THAT
CONNECT US ALL

The Coral Triangle contains vibrant, colorful and exquisite coral. These rich and diverse reefs are nurseries for thousands of tropical fish species, sea turtles, whales and dolphins.

The pelagic tuna fish and families of gentle manta rays find sanctuary in the Coral Triangle's seas. These reefs also provide food security and coastal protection for millions of people living in the region.

The Coral Triangle - the "Amazon of the Seas"

3000 species of reef fish have been discovered in the Coral Triangle.

76% of all coral species in the world are found in the Coral Triangle.

Friends of CTC

Become a friend of The Coral Triangle Center who shares our vision of healthy seas and people.

Your support will help empower communities to protect our Coral Triangle's reefs, and keep them alive for generations to come.

What are we doing?

The Coral Triangle Center transforms marine resource management and safeguards the future of the Coral Triangle. We work closely with local communities, the private sector, governments and other partners to shape lasting solutions to protect coral reef ecosystems. We provide education, training, and make sure that marine parks are managed effectively. We invest in people, in livelihoods and our future.

130 million people

depend on the region's reefs for food security, employment and coastal protection.

Thousands of mammals such as dolphins and whales

play an important role in the region's ecosystems

The Coral Triangle is in Danger

- **95% of all reefs are threatened** by human activities. The major types of detrimental human activities include overfishing, destructive fishing methods and pollution which lead to the devastation of coral and marine life.
- **Without immediate action, 70% of the Coral Triangle's reefs will be destroyed by 2050.** Oceans are in peril and fish stock in jeopardy. ***Our future is at stake.***

The Coral Triangle Center (CTC)

CTC is a locally based Non-Profit Organization with a regional outreach and a global impact. We are dedicated to protecting coral reef ecosystems for future generations. CTC is working towards the implementation of marine conservation parks across the region, along with training communities to maintain this unique marine heritage.
